

Call for Participation in the NEM Expo

Have you

- Organized or conducted outreach activities for HF/E?
- Developed creative ways of introducing others to the field of HF/E?
- Won the NEM Best Action Plan in previous years?

If so, we are looking for you!

This year at HFES, the NEM session is being transformed into an NEM Expo. We are **seeking student chapters, local chapters, and professionals** who have this experience and would be willing to volunteer to “train the trainer” during the NEM Expo.

What is “Train the Trainer”?

The overarching goal would be for attendees to stop by at any time during the NEM session and interact with you at a table or booth to gather lessons learned, see demonstrations of activities that have worked, view materials that have been useful, etc. so that they can be empowered to organize their own outreach activities in the future. Volunteers would be responsible for bringing their own materials and running their own activities as applicable during the session. The NEM Committee will be available to assist in preparations and during the session as well.

If you are interested or you have any questions, please contact the NEM Chair, Raegan Hoeft, raegan.m.hoeft@lmco.com, 609-326-4214. Remember that NEM is all about Teaching, Learning, Networking, Service and Fun! Show your support for NEM by participating in the 2011 NEM Expo!
